

FIRST REGULAR SESSION
[PERFECTED]
HOUSE COMMITTEE SUBSTITUTE FOR
HOUSE BILL NO. 241
91ST GENERAL ASSEMBLY

Reported from the Committee on Civil and Administrative Law, February 15, 2001, with recommendation that the House Committee Substitute for House Bill No. 241 Do Pass.

Taken up for Perfection February 26, 2001. House Committee Substitute for House Bill No. 241 ordered Perfected and printed.

TED WEDEL, Chief Clerk

0639L.03P

AN ACT

To repeal sections 456.012, 456.013, 456.700, 456.710, 456.720, 456.730, 456.740, 456.750, 456.760, 456.770, 456.780, 456.790, 456.800, 456.810 and 456.820, RSMo 2000, relating to trusts and estates, and to enact in lieu thereof thirty-five new sections relating to the same subject.

Be it enacted by the General Assembly of the state of Missouri, as follows:

Section A. Sections 456.012, 456.013, 456.700, 456.710, 456.720, 456.730, 456.740, 456.750, 456.760, 456.770, 456.780, 456.790, 456.800, 456.810 and 456.820, RSMo 2000, are repealed and thirty-five new sections enacted in lieu thereof, to be known as sections 456.236, 469.401, 469.403, 469.405, 469.409, 469.411, 469.413, 469.415, 469.417, 469.419, 469.421, 469.423, 469.425, 469.427, 469.429, 469.431, 469.432, 469.433, 469.435, 469.437, 469.439, 469.441, 469.443, 469.445, 469.447, 469.449, 469.451, 469.453, 469.455, 469.457, 469.459, 469.461, 469.463, 469.465 and 469.467, to read as follows:

456.236. 1. The rule against perpetuities shall not apply to and any rule prohibiting unreasonable restraints on or suspension of the power of alienation shall not be violated by a trust if a trustee, or other person or persons to whom the power is properly granted or delegated, has the power pursuant to the terms of the trust or applicable law to sell the trust property during the period of time the trust continues beyond the period of the rule against perpetuities that would apply to the trust but for this subsection.

EXPLANATION — Matter enclosed in bold faced brackets [thus] in this bill is not enacted and is intended to be omitted in the law.

7 **2. No rule against accumulations shall apply to a trust described in subsection 1 of**
8 **this section unless the terms of the trust require that the income be accumulated during a**
9 **period of time the trust continues beyond the period of the rule against perpetuities that**
10 **would apply to the trust but for subsection 1 of this section. If the terms of the trust**
11 **require that the income be accumulated during any period of time the trust continues**
12 **beyond the period of the rule against perpetuities that would apply to the trust but for**
13 **subsection 1 of this section, then during that period of time the trustee shall have the power**
14 **to make discretionary distributions of net income to such recipients and in such shares and**
15 **in such manner as most closely effectuates the settlor's or testator's manifested plan of**
16 **distribution.**

17 **3. The provisions of this section apply to:**

18 **(1) Any trust created by a will or inter vivos agreement, or pursuant to the exercise**
19 **of a power of appointment other than a general power of appointment granted under a will**
20 **or inter vivos agreement, executed or amended on or after August 28, 2001;**

21 **(2) Any trust created pursuant to the exercise of a general power of appointment**
22 **exercised in an instrument executed or amended on or after August 28, 2001; or**

23 **(3) Any trust created by a will or inter vivos agreement, or pursuant to the exercise**
24 **of a power of appointment granted under a will or inter vivos agreement, executed or**
25 **amended before August 28, 2001, if the laws of this state become applicable to the trust**
26 **after such date, the laws of any other state applied to the trust before such date, and the**
27 **rule against perpetuities did not apply to the trust pursuant to the laws of the other state.**

28 **4. As used in this section, the term "trust" shall have the same meaning as in**
29 **subdivision (2) of section 456.500, except that the term shall not include a trust that is not**
30 **subject to the rule against perpetuities by reason of any other law of this state.**

469.401. As used in sections 469.401 to 469.467, the following terms mean:

2 **(1) "Accounting period", a calendar year unless another twelve-month period is**
3 **selected by a fiduciary. The term includes a portion of a calendar year or other twelve-**
4 **month period that begins when an income interest begins or ends when an income interest**
5 **ends;**

6 **(2) "Beneficiary", an heir, legatee and devisee of a decedent's estate, and an income**
7 **beneficiary and a remainder beneficiary of a trust, including any type of entity that has a**
8 **beneficial interest in either an estate or a trust;**

9 **(3) "Fiduciary", a personal representative, trustee, executor, administrator,**
10 **successor personal representative, special administrator and any other person performing**
11 **substantially the same function;**

12 **(4) "Income", money or property that a fiduciary receives as current return from**

13 a principal asset, including a portion of receipts from a sale, exchange or liquidation of a
14 principal asset, as provided in sections 469.423 to 469.449;

15 (5) "Income beneficiary", a person to whom net income of a trust is or may be
16 payable;

17 (6) "Income interest", the right of an income beneficiary to receive all or part of
18 net income, whether the terms of the trust require it to be distributed or authorize it to be
19 distributed in the trustee's discretion;

20 (7) "Mandatory income interest", the right of an income beneficiary to receive net
21 income that the terms of the trust require the fiduciary to distribute;

22 (8) "Net income", if section 469.411 applies to the trust, the unitrust amount, or if
23 section 469.411 does not apply to the trust, the total receipts allocated to income during an
24 accounting period minus the disbursements made from income during the same period,
25 plus or minus transfers pursuant to sections 469.401 to 469.467 to or from income during
26 the same period;

27 (9) "Person", an individual, corporation, business trust, estate, trust, partnership,
28 limited liability company, association, joint venture, government, governmental
29 subdivision, agency, or instrumentality, public corporation or any other legal or
30 commercial entity;

31 (10) "Principal", property held in trust for distribution to a remainder beneficiary
32 when the trust terminates;

33 (11) "Qualified beneficiary", a beneficiary who, on the date qualification is
34 determined, either is entitled or eligible to receive a distribution of trust income or
35 principal, or would be entitled to receive a distribution if the event causing the trust to
36 terminate occurred on that date;

37 (12) "Remainder beneficiary", a person entitled to receive principal when an
38 income interest ends;

39 (13) "Terms of a trust", the manifestation of the settlor's or decedent's intent
40 expressed in a manner which is admissible as proof in a judicial proceeding, whether by
41 written or spoken words or by conduct;

42 (14) "Trustee", an original, additional or successor trustee, whether or not
43 appointed or confirmed by a court;

44 (15) "Unitrust amount", net income as defined by section 469.411.

469.403. 1. In allocating receipts and disbursements to or between principal and
2 income, and with respect to any matter within the scope of sections 469.413 to 469.421, a
3 fiduciary:

4 (1) Shall administer a trust or estate under the terms of the trust or the will, even

5 if there is a different provision in sections 469.401 to 469.467;

6 (2) May administer a trust or estate by exercising a discretionary power of
7 administration given to the fiduciary by the terms of the trust or the will, even if the
8 exercise of the power produces a result different from a result required or permitted by
9 sections 469.401 to 469.467;

10 (3) Shall administer a trust or estate pursuant to sections 469.401 to 469.467 if the
11 terms of the trust or the will do not contain a different provision or do not give the
12 fiduciary a discretionary power of administration; and

13 (4) Shall add a receipt or charge a disbursement to principal to the extent that the
14 terms of the trust and sections 469.401 to 469.467 do not provide a rule for allocating the
15 receipt or disbursement to or between principal and income.

16 2. In exercising the power to adjust pursuant to section 469.405 or a discretionary
17 power of administration regarding a matter within the scope of sections 469.401 to 469.467,
18 whether granted by the terms of a trust, a will, or sections 469.401 to 469.467, a fiduciary
19 shall administer a trust or estate impartially, based on what is fair and reasonable to all
20 of the beneficiaries, except to the extent that the terms of the trust or the will clearly
21 manifest an intent that the fiduciary shall or may favor one or more of the beneficiaries.
22 A determination in accordance with sections 469.401 to 469.467 is presumed to be fair and
23 reasonable to all of the beneficiaries.

469.405. 1. A trustee may adjust between principal and income to the extent the
2 trustee considers necessary if the trustee invests and manages trust assets as a prudent
3 investor, the terms of the trust describe the amount that may or shall be distributed to a
4 beneficiary by referring to the trust's income, and the trustee determines, after applying
5 subsection 1 of section 469.403, that the trustee is unable to comply with subsection 2 of
6 section 469.403.

7 2. In deciding whether and to what extent to exercise the power conferred by
8 subsection 1 of this section, a trustee shall consider all factors relevant to the trust and its
9 beneficiaries, including the following factors to the extent relevant:

10 (1) The nature, purpose and expected duration of the trust;

11 (2) The intent of the settlor;

12 (3) The identity and circumstances of the beneficiaries;

13 (4) The needs for liquidity, regularity of income, and preservation and appreciation
14 of capital;

15 (5) The assets held in the trust, including the extent to which such assets consist of
16 financial assets, interests in closely held enterprises, tangible and intangible personal
17 property, or real property, and the extent to which such assets are used by a beneficiary,

18 and whether such assets were purchased by the trustee or received from the settlor;

19 (6) The net amount allocated to income pursuant to sections 469.401 to 469.467,
20 other than this section, and the increase or decrease in the value of the principal assets,
21 which the trustee may estimate as to assets for which market values are not readily
22 available;

23 (7) Whether and to what extent the terms of the trust give the trustee the power to
24 invade principal or accumulate income, or prohibit the trustee from invading principal or
25 accumulating income, and the extent to which the trustee has exercised a power from time
26 to time to invade principal or accumulate income;

27 (8) The actual and anticipated effect of economic conditions on principal and
28 income and effects of inflation and deflation; and

29 (9) The anticipated tax consequences of an adjustment.

30 3. A trustee may not make an adjustment:

31 (1) That diminishes the income interest in a trust which requires all of the income
32 to be paid at least annually to a spouse and for which an estate tax or gift tax marital
33 deduction would be allowed, in whole or in part, if the trustee did not have the power to
34 make the adjustment;

35 (2) That reduces the actuarial value of the income interest in a trust to which a
36 person transfers property with the intent to qualify for a gift tax exclusion;

37 (3) That changes the amount payable to a beneficiary as a fixed annuity or a fixed
38 fraction of the value of the trust assets;

39 (4) From any amount that is permanently set aside for charitable purposes under
40 a will or the terms of a trust to the extent that the existence of the power to adjust would
41 change the character of the amount set aside for federal income, gift or estate tax purposes;

42 (5) If possessing or exercising the power to make an adjustment causes an
43 individual to be treated as the owner of all or part of the trust for income tax purposes, and
44 the individual would not be treated as the owner if the trustee did not possess the power
45 to make an adjustment;

46 (6) If possessing or exercising the power to make an adjustment causes all or part
47 of the trust assets to be included for estate tax purposes in the estate of an individual who
48 has the power to remove or appoint a trustee, or both, and the assets would not be included
49 in the estate of the individual if the trustee did not possess the power to make an
50 adjustment;

51 (7) If the trustee is a beneficiary of the trust; or

52 (8) If the trustee is not a beneficiary, but the adjustment would benefit the trustee
53 directly or indirectly.

54 **4. If subdivision (5), (6), (7) or (8) of subsection 3 of this section applies to a trustee**
55 **and there is more than one trustee, a co-trustee to whom the provision does not apply may**
56 **make the adjustment unless the exercise of the power by the remaining trustee or trustees**
57 **is not permitted by the terms of the trust.**

58 **5. A trustee may release the entire power conferred by subsection 1 of this section,**
59 **or may release only the power to adjust from income to principal or the power to adjust**
60 **from principal to income if the trustee is uncertain about whether possessing or exercising**
61 **the power will cause a result described in subdivisions (1) to (6) or subdivision (8) of**
62 **subsection 3 of this section, or if the trustee determines that possessing or exercising the**
63 **power will or may deprive the trust of a tax benefit or impose a tax burden not described**
64 **in subsection 3 of this section. The release may be permanent or for a specified period,**
65 **including a period measured by the life of an individual.**

66 **6. Terms of a trust that limit the power of a trustee to make an adjustment between**
67 **principal and income do not affect the application of this section unless it is clear from the**
68 **terms of the trust that the terms are intended to deny the trustee the power of adjustment**
69 **conferred by subsection 1 of this section.**

469.409. 1. Any claim for breach of a trustee's duty to impartially administer a
2 **trust related, directly or indirectly, to an adjustment made by a fiduciary to the allocation**
3 **between principal and income pursuant to subsection 1 of section 469.405 or any allocation**
4 **made by the fiduciary pursuant to any authority or discretion specified in subsection 1 of**
5 **section 469.403, unless previously barred by adjudication, consent or other limitation, shall**
6 **be barred as provided in this section. Any such claim is barred if not asserted in a judicial**
7 **proceeding brought by any beneficiary with any interest whatsoever in the trust, no matter**
8 **how remote or contingent, or whether or not the beneficiary is ascertainable or has the**
9 **capacity to contract, within two years after the trustee has sent a report to all qualified**
10 **beneficiaries that adequately discloses the facts constituting the claim.**

11 **2. For purposes of this section the following rules shall apply:**

12 **(1) A report adequately discloses the facts constituting a claim if it provides**
13 **sufficient information so that the beneficiary should know of the claim or reasonably**
14 **should have inquired into its existence;**

15 **(2) A qualified beneficiary is deemed to have been sent a report if:**

16 **(a) In the case of a qualified beneficiary who has the capacity to contract, the report**
17 **is either delivered personally to the beneficiary or sent to the beneficiary at the**
18 **beneficiary's last known address;**

19 **(b) In the case of a qualified beneficiary who lacks the capacity to contract, the**
20 **report is either hand delivered to a person with respect to whom pursuant to subdivision**

21 (2) of section 472.300, RSMo, an order would bind that beneficiary with respect to the
22 subject of the claim or sent to the person at that person's last known address, provided that
23 there is no conflict of interest between that person and the qualified beneficiary that person
24 is representing;

25 (3) The determination of the identity of all qualified beneficiaries shall be made on
26 the date the report is deemed to have been sent; and

27 (4) This section does not preclude an action to recover for fraud or
28 misrepresentation related to the report.

469.411. 1. If the provisions of this section apply to a trust, the unitrust amount
2 shall be determined as follows:

3 (1) For the first three accounting periods of the trust, the unitrust amount for a
4 current valuation year of the trust shall be three percent, or any higher percentage
5 specified by the terms of the governing instrument or by the election made in accordance
6 with subdivision (2) of subsection 5 of this section, of the net fair market values of the
7 assets held in the trust on the first business day of the current valuation year;

8 (2) Beginning with the fourth accounting period of the trust, the unitrust amount
9 for a current valuation year of the trust shall be three percent, or any higher percentage
10 specified by the terms of the governing instrument or by the election made in accordance
11 with subdivision (2) of subsection 5 of this section, of the average of the net fair market
12 values of the assets held in the trust on the first business day of the current valuation year
13 and the net fair market values of the assets held in the trust on the first business day of
14 each prior valuation year;

15 (3) The unitrust amount for the current valuation year computed pursuant to
16 subdivision (1) or (2) of this subsection shall be proportionately reduced for any
17 distributions, in whole or in part, other than distributions of the unitrust amount, and for
18 any payments of expenses, including debts, disbursements and taxes, from the trust within
19 a current valuation year that the trustee determines to be material and substantial, and
20 shall be proportionately increased for the receipt, other than a receipt that represents a
21 return on investment, of any additional property into the trust within a current valuation
22 year;

23 (4) For purposes of subdivision (2) of this subsection, the net fair market values of
24 the assets held in the trust on the first business day of a prior valuation year shall be
25 adjusted to reflect any reduction, in the case of a distribution or payment, or increase, in
26 the case of a receipt, for the prior valuation year pursuant to subdivision (3) of this
27 subsection, as if the distribution, payment or receipt had occurred on the first day of the
28 prior valuation year;

29 (5) In the case of a short accounting period, the trustee shall prorate the unitrust
30 amount on a daily basis;

31 (6) In the case where the net fair market value of an asset held in the trust has been
32 incorrectly determined either in a current valuation year or in a prior valuation year, the
33 unitrust amount shall be increased in the case of an undervaluation, or be decreased in the
34 case of an overvaluation, by an amount equal to the difference between the unitrust
35 amount determined based on the correct valuation of the asset and the unitrust amount
36 originally determined.

37 2. As used in this section, the following terms mean:

38 (1) "Current valuation year", the accounting period of the trust for which the
39 unitrust amount is being determined;

40 (2) "Prior valuation year", each of the two accounting periods of the trust
41 immediately preceding the current valuation year.

42 3. In determining the sum of the net fair market values of the assets held in the
43 trust for purposes of subdivisions (1) and (2) of subsection 1 of this section, there shall not
44 be included the value of:

45 (1) Any residential property or any tangible personal property that, as of the first
46 business day of the current valuation year, one or more income beneficiaries of the trust
47 have or had the right to occupy, or have or had the right to possess or control, other than
48 in a capacity as trustee, and instead the right of occupancy or the right to possession or
49 control shall be deemed to be the unitrust amount with respect to the residential property
50 or the tangible personal property; or

51 (2) Any asset specifically given to a beneficiary under the terms of the trust and the
52 return on investment on that asset, which return on investment shall be distributable to the
53 beneficiary.

54 4. In determining the net fair market value of each asset held in the trust pursuant
55 to subdivisions (1) and (2) of subsection 1 of this section, the trustee shall, not less often
56 than annually, determine the fair market value of each asset of the trust that consists
57 primarily of real property or other property that is not traded on a regular basis in an
58 active market by appraisal or other reasonable method or estimate, and that
59 determination, if made reasonably and in good faith, shall be conclusive as to all persons
60 interested in the trust. Any claim based on a determination made pursuant to this
61 subsection shall be barred if not asserted in a judicial proceeding brought by any
62 beneficiary with any interest whatsoever in the trust within two years after the trustee has
63 sent a report to all qualified beneficiaries that adequately discloses the facts constituting
64 the claim. The rules set forth in subsection 2 of section 469.409 shall apply to the barring

65 of claims pursuant to this subsection.

66 **5. This section shall apply to the following trusts:**

67 **(1) Any trust created after August 28, 2001, with respect to which the terms of the**
68 **trust clearly manifest an intent that this section apply;**

69 **(2) Any trust created under an instrument that became irrevocable on or before**
70 **August 28, 2001, if the trustee, in the trustee's discretion, elects to have this section apply**
71 **two years from August 28, 2001, unless the instrument creating the trust provides**
72 **otherwise. The trustee shall deliver notice to all qualified beneficiaries and the settlor of**
73 **the trust, if he or she is then living, of the trustee's intent to make such an election at least**
74 **sixty days before making that election. The trustee shall have sole authority to make the**
75 **election. Delivery of the notice to a person with respect to whom, pursuant to subdivision**
76 **(2) of section 472.300, RSMo, an order would bind a beneficiary of the trust is delivery of**
77 **notice to that beneficiary for all purposes of this subsection. An action or order by any**
78 **court shall not be required. The election shall be made by a signed writing delivered to the**
79 **settlor of the trust, if he or she is then living, and to all qualified beneficiaries. The election**
80 **is irrevocable, unless revoked by order of the court having jurisdiction of the trust. The**
81 **election may specify the percentage used to determine the unitrust amount pursuant to this**
82 **section, provided that such percentage is three percent or greater, or if no percentage is**
83 **specified, then that percentage shall be three percent. In making an election pursuant to**
84 **this subsection, the trustee shall be subject to the same limitations and conditions as apply**
85 **to an adjustment between income and principal pursuant to subsections 3 and 4 of section**
86 **469.409;**

87 **(3) No action of any kind based on an election made or not made by a trustee**
88 **pursuant to subdivision (2) of this subsection shall be brought against the trustee by any**
89 **beneficiary of that trust three years from August 28, 2001.**

469.413. After a decedent dies, in the case of an estate, or after an income interest
2 **in a trust ends, the following rules apply:**

3 **(1) A fiduciary of an estate or of a terminating income interest shall determine the**
4 **amount of net income and net principal receipts received from property specifically given**
5 **to a beneficiary pursuant to the rules in sections 469.417 to 469.461 which apply to trustees**
6 **and the rules in subdivision (5) of this section. The fiduciary shall distribute the net income**
7 **and net principal receipts to the beneficiary who is to receive the specific property;**

8 **(2) A fiduciary shall determine the remaining net income of a decedent's estate or**
9 **a terminating income interest pursuant to the rules in sections 469.417 to 469.461 which**
10 **apply to trustees and by:**

11 **(a) Including in net income all income from property used to discharge liabilities;**

12 (b) Paying from income or principal, in the fiduciary's discretion, fees of attorneys,
13 accountants and fiduciaries; court costs and other expenses of administration; and interest
14 on death taxes, but the fiduciary may pay those expenses from income of property passing
15 to a trust for which the fiduciary claims an estate tax marital or charitable deduction only
16 to the extent that the payment of those expenses from income will not cause the reduction
17 or loss of the deduction; and

18 (c) Paying from principal all other disbursements made or incurred in connection
19 with the settlement of a decedent's estate or the winding up of a terminating income
20 interest, including debts, funeral expenses, disposition of remains, family allowances, and
21 death taxes and related penalties that are apportioned to the estate or terminating income
22 interest by the will, the terms of the trust, or applicable law;

23 (3) A fiduciary shall distribute to a beneficiary who receives a pecuniary amount
24 outright the interest or any other amount provided by the will, the terms of the trust, or
25 in the absence of any such provisions, the provisions of section 473.633, RSMo, from net
26 income determined pursuant to subdivision (2) of this section or from principal to the
27 extent that net income is insufficient. If a beneficiary is to receive a pecuniary amount
28 outright from a trust after an income interest ends and no interest or other amount is
29 provided for by the terms of the trust or applicable law, the fiduciary shall distribute the
30 interest or other amount to which the beneficiary would be entitled under applicable law
31 if the pecuniary amount were required to be paid under a will;

32 (4) A fiduciary shall distribute the net income remaining after distributions
33 required by subdivision (3) of this section in the manner described in section 469.415 to all
34 other beneficiaries, including a beneficiary who receives a pecuniary amount in trust, even
35 if the beneficiary holds an unqualified power to withdraw assets from the trust or other
36 presently exercisable general power of appointment over the trust;

37 (5) A fiduciary may not reduce principal or income receipts from property
38 described in subdivision (1) of this section because of a payment described in sections
39 469.451 and 469.453 to the extent that the will, the terms of the trust, or applicable law
40 requires the fiduciary to make the payment from assets other than the property or to the
41 extent that the fiduciary recovers or expects to recover the payment from a third party.
42 The net income and principal receipts from the property are determined by including all
43 of the amounts the fiduciary receives or pays with respect to the property, whether those
44 amounts accrued or became due before, on or after the date of a decedent's death or an
45 income interest's terminating event, and by making a reasonable provision for amounts
46 that the fiduciary believes the estate or terminating income interest may become obligated
47 to pay after the property is distributed.

469.415. 1. Each beneficiary described in subdivision (4) of section 469.413 is entitled to receive a portion of the net income equal to the beneficiary's fractional interest in undistributed principal assets, using values as of the distribution date. If a fiduciary makes more than one distribution of assets to beneficiaries to whom this section applies, each beneficiary, including one who does not receive part of the distribution, is entitled, as of each distribution date, to the net income the fiduciary has received after the date of death or terminating event or earlier distribution date but has not distributed as of the current distribution date.

2. In determining a beneficiary's share of net income, the following rules apply:

(1) The beneficiary is entitled to receive a portion of the net income equal to the beneficiary's fractional interest in the undistributed principal assets immediately before the distribution date, including assets that later may be sold to meet principal obligations;

(2) The beneficiary's fractional interest in the undistributed principal assets shall be calculated without regard to property specifically given to a beneficiary and property required to pay pecuniary amounts not in trust;

(3) The beneficiary's fractional interest in the undistributed principal assets shall be calculated on the basis of the aggregate value of those assets as of the distribution date without reducing the value by any unpaid principal obligation;

(4) The distribution date for purposes of this section may be the date as of which the fiduciary calculates the value of the assets if that date is reasonably near the date on which assets are actually distributed.

3. If a fiduciary does not distribute all of the collected but undistributed net income to each person as of a distribution date, the fiduciary shall maintain appropriate records showing the interest of each beneficiary in that net income.

4. A fiduciary may apply the rules in this section, to the extent that the fiduciary considers it appropriate, to net gain or loss realized after the date of death or terminating event or earlier distribution date from the disposition of a principal asset if this section applies to the income from the asset.

469.417. 1. An income beneficiary is entitled to net income from the date on which the income interest begins. An income interest begins on the date specified in the terms of the trust or, if no date is specified, on the date an asset becomes subject to a trust or successive income interest.

2. An asset becomes subject to a trust:

(1) On the date it is transferred to the trust in the case of an asset that is transferred to a trust during the transferor's life;

(2) On the date of a testator's death in the case of an asset that becomes subject to

9 a trust by reason of a will, even if there is an intervening period of administration of the
10 testator's estate; or

11 (3) On the date of an individual's death in the case of an asset that is transferred
12 to a fiduciary by a third party because of the individual's death.

13 3. An asset becomes subject to a successive income interest on the day after the
14 preceding income interest ends, as determined pursuant to subsection 4 of this section, even
15 if there is an intervening period of administration to wind up the preceding income
16 interest.

17 4. An income interest ends on the day before an income beneficiary dies or another
18 terminating event occurs, or on the last day of a period during which there is no
19 beneficiary to whom a trustee may distribute income.

469.419. 1. A trustee shall allocate an income receipt or disbursement other than
2 one to which section 469.413 applies to principal if its due date occurs before a decedent
3 dies in the case of an estate or before an income interest begins in the case of a trust or
4 successive income interest.

5 2. A trustee shall allocate an income receipt or disbursement to income if its due
6 date occurs on or after the date on which a decedent dies or an income interest begins and
7 it is a periodic due date. An income receipt or disbursement shall be treated as accruing
8 from day to day if its due date is not periodic or it has no due date. The portion of the
9 receipt or disbursement accruing before the date on which a decedent dies or an income
10 interest begins shall be allocated to principal and the balance shall be allocated to income.

11 3. An item of income or an obligation is due on the date a payment is required. If
12 a payment date is not stated, there is no due date for the purposes of sections 469.401 to
13 469.467. Distributions to shareholders or other owners from an entity to which section
14 469.423 applies are deemed to be due on the date fixed by the entity for determining who
15 is entitled to receive the distribution or, if no date is fixed, on the declaration date for the
16 distribution. A due date is periodic for receipts or disbursements that shall be paid at
17 regular intervals under a lease or an obligation to pay interest or if an entity customarily
18 makes distributions at regular intervals.

469.421. 1. For purposes of this section, the phrase "undistributed income" means
2 net income received before the date on which an income interest ends. The phrase does not
3 include an item of income or expense that is due or accrued, or net income that has been
4 added or is required to be added to principal under the terms of the trust.

5 2. When a mandatory income interest ends, the trustee shall pay to a mandatory
6 income beneficiary who survives that date, or the estate of a deceased mandatory income
7 beneficiary whose death causes the interest to end, the beneficiary's share of the

8 undistributed income that is not disposed of under the terms of the trust unless the
9 beneficiary has an unqualified power to revoke more than five percent of the trust
10 immediately before the income interest ends. In the latter case, the undistributed income
11 from the portion of the trust that may be revoked shall be added to principal.

12 3. When a trustee's obligation to pay a fixed annuity or a fixed fraction of the value
13 of the trust's assets ends, the trustee shall prorate the final payment if and to the extent
14 required by applicable law to accomplish a purpose of the trust or its settlor relating to
15 income, gift, estate or other tax requirements.

469.423. 1. For purposes of this section, the term "entity" means a corporation,
2 partnership, limited liability company, regulated investment company, real estate
3 investment trust, common trust fund, or any other organization in which a trustee has an
4 interest, other than a trust or estate to which section 469.425 applies, a business or activity
5 to which section 469.427 applies, or an asset-backed security to which section 469.447
6 applies.

7 2. Except as otherwise provided in this section, a trustee shall allocate to income
8 money received from an entity.

9 3. A trustee shall allocate the following receipts from an entity to principal:

10 (1) Property other than money;

11 (2) Money received in one distribution or a series of related distributions in
12 exchange for part or all of a trust's interest in the entity;

13 (3) Money received in total or partial liquidation of the entity; and

14 (4) Money received from an entity that is a regulated investment company or a real
15 estate investment trust if the money distributed is a capital gain dividend for federal
16 income tax purposes.

17 4. Money is received in partial liquidation:

18 (1) To the extent that the entity, at or near the time of a distribution, indicates that
19 such money is a distribution in partial liquidation; or

20 (2) If the total amount of money and property received in a distribution or series
21 of related distributions is greater than twenty percent of the entity's gross assets, as shown
22 by the entity's year-end financial statements immediately preceding the initial receipt.

23 5. Money is not received in partial liquidation, nor may it be taken into account
24 pursuant to subdivision (2) of subsection 4 of this section, to the extent that such money
25 does not exceed the amount of income tax that a trustee or beneficiary shall pay on taxable
26 income of the entity that distributes the money.

27 6. A trustee may rely upon a statement made by an entity about the source or
28 character of a distribution if the statement is made at or near the time of distribution by

29 the entity's board of directors or other person or group of persons authorized to exercise
30 powers to pay money or transfer property comparable to those of a corporation's board
31 of directors.

469.425. A trustee shall allocate to income an amount received as a distribution of
2 income from a trust or an estate in which the trust has an interest other than a purchased
3 interest, and shall allocate to principal an amount received as a distribution of principal
4 from such a trust or estate. If a trustee purchases an interest in a trust that is an
5 investment entity, or a decedent or donor transfers an interest in such a trust to a trustee,
6 section 469.423 or 469.449 shall apply to a receipt from the trust.

469.427. 1. If a trustee who conducts a business or other activity determines that
2 it is in the best interest of all the beneficiaries to account separately for the business or
3 activity instead of accounting for it as part of the trust's general accounting records, the
4 trustee may maintain separate accounting records for its transactions, whether or not its
5 assets are segregated from other trust assets.

6 2. A trustee who accounts separately for a business or other activity may determine
7 the extent to which net cash receipts shall be retained for working capital, the acquisition
8 or replacement of fixed assets, and other reasonably foreseeable needs of the business or
9 activity, and the extent to which the remaining net cash receipts are accounted for as
10 principal or income in the trust's general accounting records. If a trustee sells assets of the
11 business or other activity, other than in the ordinary course of the business or activity, the
12 trustee shall account for the net amount received as principal in the trust's general
13 accounting records to the extent the trustee determines that the amount received is no
14 longer required in the conduct of the business.

15 3. Activities for which a trustee may maintain separate accounting records include:

- 16 (1) Retail, manufacturing, service and other traditional business activities;
17 (2) Farming;
18 (3) Raising and selling livestock and other animals;
19 (4) Management of rental properties;
20 (5) Extraction of minerals and other natural resources;
21 (6) Timber operations; and
22 (7) Activities to which section 469.447 applies.

469.429. A trustee shall allocate to principal:

- 2 (1) To the extent not allocated to income pursuant to sections 469.401 to 469.467,
3 assets received from a transferor during the transferor's lifetime, a decedent's estate, a
4 trust with a terminating income interest, or a payer under a contract naming the trust or
5 its trustee as beneficiary;

6 (2) Money or other property received from the sale, exchange, liquidation or
7 change in form of a principal asset, including realized profit, subject to sections 469.423
8 to 469.467;

9 (3) Amounts recovered from third parties to reimburse the trust because of
10 disbursements described in subdivision (7) of subsection 1 of section 469.453 or for other
11 reasons to the extent not based on the loss of income;

12 (4) Proceeds of property taken by eminent domain, but a separate award made for
13 the loss of income with respect to an accounting period during which a current income
14 beneficiary had a mandatory income interest is income;

15 (5) Net income received in an accounting period during which there is no
16 beneficiary to whom a trustee may or shall distribute income; and

17 (6) Other receipts as provided in sections 469.435 to 469.449.

 469.431. To the extent that a trustee accounts for receipts from rental property
2 pursuant to this section, the trustee shall allocate to income an amount received as rent of
3 real or personal property, including an amount received for cancellation or renewal of a
4 lease. An amount received as a refundable deposit, including a security deposit or a
5 deposit that is to be applied as rent for future periods, shall be added to principal and held
6 subject to the terms of the lease and is not available for distribution to a beneficiary until
7 the trustee's contractual obligations have been satisfied with respect to that amount.

 469.432. 1. An amount received as interest, whether determined at a fixed, variable
2 or floating rate, on an obligation to pay money to the trustee, including an amount received
3 as consideration for prepaying principal, shall be allocated to income without any
4 provision for amortization of premium.

5 2. A trustee shall allocate to principal an amount received from the sale,
6 redemption or other disposition of an obligation to pay money to the trustee more than one
7 year after it is purchased or acquired by the trustee, including an obligation whose
8 purchase price or value when it is acquired is less than its value at maturity. If the
9 obligation matures within one year after it is purchased or acquired by the trustee, an
10 amount received in excess of its purchase price or its value when acquired by the trust shall
11 be allocated to income.

12 3. This section does not apply to an obligation to which section 469.437, 469.439,
13 469.441, 469.443, 469.447 or 469.449 applies.

 469.433. 1. Except as otherwise provided in subsection 2 of this section, a trustee
2 shall allocate to principal the proceeds of a life insurance policy or other contract in which
3 the trust or its trustee is named as beneficiary, including a contract that insures the trust
4 or its trustee against loss for damage to, destruction of, or loss of title to a trust asset. The

5 trustee shall allocate dividends on an insurance policy to income if the premiums on the
6 policy are paid from income, and to principal if the premiums are paid from principal.

7 2. A trustee shall allocate to income proceeds of a contract that insures the trustee
8 against loss of occupancy or other use by an income beneficiary, loss of income, or, subject
9 to section 469.427, loss of profits from a business.

10 3. This section does not apply to a contract to which section 469.437 applies.

469.435. If a trustee determines that an allocation between principal and income
2 required by section 469.437, 469.439, 469.441, 469.443 or 469.447 is insubstantial, the
3 trustee may allocate the entire amount to principal unless one of the circumstances
4 described in subsection 3 of section 469.405 applies to the allocation. This power may be
5 exercised by a co-trustee in the circumstances described in subsection 4 of section 469.405
6 and may be released for the reasons and in the manner described in subsection 5 of section
7 469.405. An allocation is presumed to be insubstantial if:

8 (1) The amount of the allocation would increase or decrease net income in an
9 accounting period, as determined before the allocation, by less than ten percent; or

10 (2) The value of the asset producing the receipt for which the allocation would be
11 made is less than ten percent of the total value of the trust's assets at the beginning of the
12 accounting period.

469.437. 1. As used in this section, the following terms mean:

2 (1) "Payment", an amount that is:

3 (a) Received or withdrawn from a plan; or

4 (b) One of a series of distributions that have been or will be received over a fixed
5 number of years or during the life of one or more individuals under any contractual or
6 other arrangement, or is a single payment from a plan that the trustee could have received
7 over a fixed number of years or during the life of one or more individuals;

8 (2) "Plan", a contractual, custodial, trust or other arrangement that provides for
9 distributions to the trust, including, but not limited to, qualified retirement plans,
10 Individual Retirement Accounts, Roth Individual Retirement Accounts, public and private
11 annuities, and deferred compensation, including payments received directly from an entity
12 as defined in section 469.423 regardless of whether or not such distributions are made from
13 a specific fund or account.

14 2. If any portion of a payment is characterized as a distribution to the trustee of
15 interest, dividends or a dividend equivalent, the trustee shall allocate the portion so
16 characterized to income. The trustee shall allocate the balance of that payment to
17 principal.

18 3. If no part of a payment is allocated to income pursuant to subsection 2 of this

19 section, then for each accounting period of the trust that any payment is received by the
20 trust with respect to the trust's interest in a plan, the trustee shall allocate to income that
21 portion of the aggregate value of all payments received by the trustee in that accounting
22 period equal to the amount of plan income attributable to the trust's interest in the plan
23 for that calendar year. The trustee shall allocate the balance of that payment to principal.

24 **4.** For purposes of this section, if a payment is received from a plan that maintains
25 a separate account or fund for its participants or account holders, including, but not
26 limited to, defined contribution retirement plans, Individual Retirement Accounts, Roth
27 Individual Retirement Accounts, and some types of deferred compensation plans, the
28 phrase "plan income" shall mean either the amount of the plan account or fund held for
29 the benefit of the trust that, if the plan account or fund were a trust, would be allocated to
30 income pursuant to sections 469.401 to 469.467 for that accounting period, or four percent
31 of the value of the plan account or fund on the first day of that accounting period. The
32 method of determining plan income pursuant to this subsection shall be chosen by the
33 trustee in the trustee's discretion. The trustees may change the method of determining
34 plan income pursuant to this subsection for any future accounting period.

35 **5.** For purposes of this section if the payment is received from a plan that does not
36 maintain a separate account or fund for its participants or account holders, including by
37 way of example and not limitation defined benefit retirement plans and some types of
38 deferred compensation plans, the term "plan income" shall mean four percent of the total
39 present value of the trust's interest in the plan as of the first day of the accounting period,
40 based on reasonable actuarial assumptions as determined by the trustee.

41 **6.** If, to obtain an estate or gift tax marital deduction for a trust, a trustee shall
42 allocate more of a payment to income than provided for by this section, the trustee shall
43 allocate to income the additional amount necessary to obtain the marital deduction.

469.439. 1. As used in this section, the phrase "liquidating asset" means an asset
2 whose value will diminish or terminate because the asset is expected to produce receipts
3 for a period of limited duration. The phrase includes a leasehold, patent, copyright,
4 royalty right, and right to receive payments during a period of more than one year under
5 an arrangement that does not provide for the payment of interest on the unpaid balance.
6 The phrase does not include a payment subject to section 469.437, resources subject to
7 section 469.441, timber subject to section 469.443, an activity subject to section 469.447, an
8 asset subject to section 469.449, or any asset for which the trustee establishes a reserve for
9 depreciation pursuant to section 469.455.

10 **2.** A trustee shall allocate to income ten percent of the receipts from a liquidating
11 asset and the balance to principal.

469.441. 1. To the extent that a trustee accounts for receipts from an interest in minerals or other natural resources pursuant to this section, the trustee shall allocate them as follows:

(1) If received as nominal delay rental or nominal annual rent on a lease, a receipt shall be allocated to income;

(2) If received from a production payment, a receipt shall be allocated to income if and to the extent that the agreement creating the production payment provides a factor for interest or its equivalent. The balance shall be allocated to principal;

(3) If an amount received as a royalty, shut-in-well payment, take-or-pay payment, bonus or delay rental is more than nominal, ninety percent shall be allocated to principal and the balance to income;

(4) If an amount is received from a working interest or any other interest not provided for in subdivision (1), (2) or (3) of this subsection, ninety percent of the net amount received shall be allocated to principal and the balance to income.

2. An amount received on account of an interest in water that is renewable shall be allocated to income. If the water is not renewable, ninety percent of the amount shall be allocated to principal and the balance to income.

3. Sections 469.401 to 469.467 apply whether or not a decedent or donor was extracting minerals, water or other natural resources before the interest became subject to the trust.

4. If a trust owns an interest in minerals, water or other natural resources on August 28, 2001, the trustee may allocate receipts from the interest as provided in sections 469.401 to 469.467 or in the manner used by the trustee before August 28, 2001. If the trust acquires an interest in minerals, water or other natural resources after August 28, 2001, the trustee shall allocate receipts from the interest as provided in sections 469.401 to 469.467.

469.443. 1. To the extent that a trustee accounts for receipts from the sale of timber and related products pursuant to this section, the trustee shall allocate the net receipts:

(1) To income to the extent that the amount of timber removed from the land does not exceed the rate of growth of the timber during the accounting periods in which a beneficiary has a mandatory income interest;

(2) To principal to the extent that the amount of timber removed from the land exceeds the rate of growth of the timber or the net receipts are from the sale of standing timber;

(3) To or between income and principal if the net receipts are from the lease of timberland or from a contract to cut timber from land owned by a trust, by determining

11 the amount of timber removed from the land under the lease or contract and applying the
12 rules in subdivisions (1) and (2) of this subsection; or

13 (4) To principal to the extent that advance payments, bonuses and other payments
14 are not allocated pursuant to either subdivision (1), (2) or (3) of this subsection.

15 2. In determining net receipts to be allocated pursuant to subsection 1 of this
16 section, a trustee shall deduct and transfer to principal a reasonable amount for depletion.

17 3. Sections 469.401 to 469.467 apply whether or not a decedent or transferor was
18 harvesting timber from the property before it became subject to the trust.

19 4. If a trust owns an interest in timberland on August 28, 2001, the trustee may
20 allocate net receipts from the sale of timber and related products as provided in sections
21 469.401 to 469.467 or in the manner used by the trustee before August 28, 2001. If the trust
22 acquires an interest in timberland after August 28, 2001, the trustee shall allocate net
23 receipts from the sale of timber and related products as provided in sections 469.401 to
24 469.467.

469.445. 1. If a marital deduction is allowed for all or part of a trust whose assets
2 consist substantially of property that does not provide the spouse with sufficient income
3 from or use of the trust assets, and if the amounts that the trustee transfers from principal
4 to income pursuant to section 469.405 and distributes to the spouse from principal
5 pursuant to the terms of the trust are insufficient to provide the spouse with the beneficial
6 enjoyment required to obtain the marital deduction, the spouse may require the trustee to
7 make property productive of income, convert property within a reasonable time, or
8 exercise the power conferred by subsection 1 of section 469.405. The trustee may decide
9 which action or combination of actions to take.

10 2. In cases not governed by subsection 1 of this section, proceeds from the sale or
11 other disposition of an asset are principal without regard to the amount of income the asset
12 produces during any accounting period.

469.447. 1. As used in this section, the term "derivative" means a contract or
2 financial instrument or a combination of contracts and financial instruments which gives
3 a trust the right or obligation to participate in some or all changes in the price of a tangible
4 or intangible asset or group of assets, or changes in a rate, an index of prices or rates, or
5 other market indicator for an asset or a group of assets.

6 2. To the extent that a trustee does not account pursuant to section 469.427 for
7 transactions in derivatives, the trustee shall allocate to principal receipts from and
8 disbursements made in connection with those transactions.

9 3. If a trustee grants an option to buy property from the trust, whether or not the
10 trust owns the property when the option is granted, grants an option that permits another

11 person to sell property to the trust, or acquires an option to buy property for the trust or
12 an option to sell an asset owned by the trust, and the trustee or other owner of the asset is
13 required to deliver the asset if the option is exercised, an amount received for granting the
14 option shall be allocated to principal. An amount paid to acquire the option shall be paid
15 from principal. A gain or loss realized upon the exercise of an option, including an option
16 granted to a settlor of the trust for services rendered, shall be allocated to principal.

469.449. 1. As used in this section, the phrase "asset-backed security" means an
2 asset whose value is based upon the right it gives the owner to receive distributions from
3 the proceeds of financial assets that provide collateral for the security. The phrase includes
4 an asset that gives the owner the right to receive from the collateral financial assets only
5 the interest or other current return or only the proceeds other than interest or current
6 return. The phrase does not include an asset to which section 469.423 or 469.435 applies.

7 2. If a trust receives a payment from interest or other current return and from
8 other proceeds of the collateral financial assets, the trustee shall allocate to income the
9 portion of the payment which the payer identifies as being from interest or other current
10 return and shall allocate the balance of the payment to principal.

11 3. If a trust receives one or more payments in exchange for the trust's entire interest
12 in an asset-backed security in one accounting period, the trustee shall allocate the
13 payments to principal. If a payment is one of a series of payments that will result in the
14 liquidation of the trust's interest in the security over more than one accounting period, the
15 trustee shall allocate ten percent of the payment to income and the balance to principal.

469.451. A trustee shall make the following disbursements from income to the
2 extent that they are not disbursements to which paragraph (b) or (c) of subdivision (2) of
3 section 469.413 applies:

4 (1) One-half of the regular compensation of the trustee and of any person providing
5 investment advisory or custodial services to the trustee;

6 (2) One-half of all expenses for accountings, judicial proceedings, or other matters
7 that involve both the income and remainder interests;

8 (3) All of the other ordinary expenses incurred in connection with the
9 administration, management or preservation of trust property and the distribution of
10 income, including interest, ordinary repairs, regularly recurring taxes assessed against
11 principal, and expenses of a proceeding or other matter that concerns primarily the income
12 interest; and

13 (4) Recurring premiums on insurance covering the loss of a principal asset or the
14 loss of income from or use of the asset.

469.453. 1. A trustee shall make the following disbursements from principal:

2 (1) The remaining one-half of the disbursements described in subdivisions (1) and
3 (2) of section 469.451;

4 (2) All of the trustee's compensation calculated on principal as a fee for acceptance,
5 distribution or termination, and disbursements made to prepare property for sale;

6 (3) Payments on the principal of a trust debt;

7 (4) Expenses of a proceeding or other matter that concerns primarily an interest
8 in principal;

9 (5) Premiums paid on a policy of insurance not described in subdivision (4) of
10 section 469.451 of which the trust is the owner and beneficiary;

11 (6) Estate, inheritance and other transfer taxes, including penalties, apportioned
12 to the trust; and

13 (7) Disbursements related to environmental matters, including reclamation,
14 assessing environmental conditions, remedying and removing environmental
15 contamination, monitoring remedial activities and the release of substances, preventing
16 future releases of substances, collecting amounts from persons liable or potentially liable
17 for the costs of those activities, penalties imposed under environmental laws or regulations
18 and other payments made to comply with those laws or regulations, statutory or common
19 law claims by third parties, and defending claims based on environmental matters.

20 2. If a principal asset is encumbered with an obligation that requires income from
21 that asset to be paid directly to the creditor, the trustee shall transfer from principal to
22 income an amount equal to the income paid to the creditor in reduction of the principal
23 balance of the obligation.

 469.455. 1. As used in this section, the term "depreciation" means a reduction in
2 value due to wear, tear, decay, corrosion or gradual obsolescence of a fixed asset having
3 a useful life of more than one year.

4 2. A trustee may transfer to principal a reasonable amount of the net cash receipts
5 from a principal asset that is subject to depreciation, but may not transfer any amount for
6 depreciation:

7 (1) Of that portion of real property used or available for use by a beneficiary as a
8 residence or of tangible personal property held or made available for the personal use or
9 enjoyment of a beneficiary;

10 (2) During the administration of a decedent's estate; or

11 (3) Pursuant to this section if the trustee is accounting pursuant to section 469.427
12 for the business or activity in which the asset is used.

13 3. An amount transferred to principal need not be held as a separate fund.

 469.457. 1. If a trustee makes or expects to make a principal disbursement

2 described in this section, the trustee may transfer an appropriate amount from income to
3 principal in one or more accounting periods to reimburse principal or to provide a reserve
4 for future principal disbursements.

5 2. Principal disbursements to which subsection 1 of this section applies include the
6 following, but only to the extent that the trustee has not been and does not expect to be
7 reimbursed by a third party:

8 (1) An amount chargeable to income but paid from principal because it is unusually
9 large, including extraordinary repairs;

10 (2) Disbursements made to prepare property for rental, including tenant
11 allowances, leasehold improvements, and broker's commissions;

12 (3) Periodic payments on an obligation secured by a principal asset to the extent
13 that the amount transferred from income to principal for depreciation is less than the
14 periodic payments; and

15 (4) Disbursements described in subdivision (7) of subsection 1 of section 469.453.

16 3. If the asset whose ownership gives rise to the disbursements becomes subject to
17 a successive income interest after an income interest ends, a trustee may continue to
18 transfer amounts from income to principal as provided in subsection 1 of this section.

469.459. 1. A tax required to be paid by a trustee based on receipts allocated to
2 income shall be paid from income.

3 2. A tax required to be paid by a trustee based on receipts allocated to principal
4 shall be paid from principal, even if the tax is called an income tax by the taxing authority.

5 3. A tax required to be paid by a trustee on the trust's share of an entity's taxable
6 income shall be paid proportionately:

7 (1) From income to the extent that receipts from the entity are allocated to income;
8 and

9 (2) From principal to the extent that:

10 (a) Receipts from the entity are allocated to principal; and

11 (b) The trust's share of the entity's taxable income exceeds the total receipts
12 described in subdivision (1) of this subsection and paragraph (a) of subdivision (2) of this
13 subsection.

14 4. For purposes of this section, receipts allocated to principal or income shall be
15 reduced by the amount distributed to a beneficiary from principal or income for which the
16 trust receives a deduction in calculating the tax.

469.461. 1. A fiduciary may make adjustments between principal and income to
2 offset the shifting of economic interests or tax benefits between income beneficiaries and
3 remainder beneficiaries which arise from:

4 (1) Elections and decisions, other than those described in subsection 2 of this
5 section, that the fiduciary makes from time to time regarding tax matters;

6 (2) An income tax or any other tax that is imposed upon the fiduciary or a
7 beneficiary as a result of a transaction involving or a distribution from the estate or trust;
8 or

9 (3) The ownership by an estate or trust of an interest in an entity whose taxable
10 income, whether or not distributed, is includable in the taxable income of the estate, trust
11 or a beneficiary.

12 2. If the amount of an estate tax marital deduction or charitable contribution
13 deduction is reduced because a fiduciary deducts an amount paid from principal for
14 income tax purposes instead of deducting it for estate tax purposes, and as a result estate
15 taxes paid from principal are increased and income taxes paid by an estate, trust or
16 beneficiary are decreased, each estate, trust or beneficiary that benefits from the decrease
17 in income tax shall reimburse the principal from which the increase in estate tax is paid.
18 The total reimbursement shall equal the increase in the estate tax to the extent that the
19 principal used to pay the increase would have qualified for a marital deduction or
20 charitable contribution deduction but for the payment. The proportionate share of the
21 reimbursement for each estate, trust or beneficiary whose income taxes are reduced shall
22 be the same as its proportionate share of the total decrease in income tax. An estate or
23 trust shall reimburse principal from income.

 469.463. In applying and construing sections 469.401 to 469.467, consideration shall
2 be given to the need to promote uniformity of the law with respect to its subject matter
3 among states that enact it.

 469.465. If any provision of sections 469.401 to 469.467 or the application of these
2 sections to any person or circumstance is held invalid, the invalidity does not affect other
3 provisions or applications of sections 469.401 to 469.467 which can be given effect without
4 the invalid provision or application.

 469.467. Sections 469.401 to 469.467 apply to every trust or decedent's estate
2 existing on August 28, 2001, except as otherwise expressly provided in the will or terms of
3 the trust or in sections 469.401 to 469.467.

 [456.012. Trustees, executors, administrators, and conservators of the estates
2 of minors and disabled persons, unless the terms of the instruments, if any, under
3 which they are acting otherwise provide, shall allocate receipts from sources
4 described in section 456.013 in accordance with that section.]

 [456.013. 1. Distributions made from ordinary income by a regulated
2 investment company or by a trust qualifying and electing to be taxed under federal
3 law as a real estate investment trust are income. All other distributions made by the

company or trust, including distributions from capital gains, depreciation, or depletion, whether in the form of cash or an option to take new stock or cash or an option to purchase additional shares, are principal.

2. The provisions of sections 456.012 and 456.013 shall apply to any receipts received after October 13, 1969, by any trust, guardianship or decedent's estate whether established before or after October 13, 1969, and whether the asset involved was acquired before or after October 13, 1969.]

[456.700. As used in this chapter:

(1) "Income beneficiary" means the person to whom income is presently payable or for whom it is accumulated for distribution as income;

(2) "Inventory value" means the cost of property purchased by the trustee and the market value of other property at the time it became subject to the trust, but the trustee may use any value finally determined for the purposes of an estate or other transfer tax;

(3) "Remainderman" means the person entitled to principal, including income which has been accumulated and added to principal;

(4) "Trustee" means an original trustee and any successor or added trustee.]

[456.710. 1. A trust shall be administered with due regard to the respective interests of income beneficiaries and remaindermen. A trust is so administered with respect to the allocation of receipts and expenditures if a receipt is credited or an expenditure is charged to income or principal or partly to each:

(1) In accordance with the terms of the trust instrument, notwithstanding contrary provisions of this chapter;

(2) In the absence of any contrary terms of the trust instrument, in accordance with the provisions of this chapter; or

(3) If neither of the preceding rules of administration is applicable, in accordance with what is reasonable and equitable in view of the interests of those entitled to income as well as of those entitled to principal, and in view of the manner in which men of ordinary prudence, discretion and judgment would act in the management of the affairs of others.

2. If the trust instrument gives the trustee discretion in crediting a receipt or charging an expenditure to income or principal or partly to each, no inference of imprudence or partiality arises from the fact that the trustee has made an allocation contrary to a provision of this chapter.]

[456.720. 1. Income is the return in money or property derived from the use of principal or income, including return received as:

(1) Rent of real or personal property, including sums received for cancellation or renewal of a lease;

(2) Interest on money lent, including sums received as consideration for the privilege of prepayment of principal except as provided in section 456.760 on bond premium and bond discount;

(3) Income earned during administration of a decedent's estate as provided in section 456.740;

- (4) Corporate distributions as provided in section 456.750;
(5) Accrued increment on bonds or other obligations issued at discount as provided in section 456.760;
(6) Receipts from business and farming operations as provided in section 456.770;
(7) Receipts from disposition of natural resources as provided in sections 456.780 and 456.790;
(8) Receipts from other principal subject to depletion as provided in section 456.800.

2. Principal is the property which has been set aside by the owner or the person legally empowered so that it is held in trust eventually to be delivered to a remainderman while the return or use of the principal is in the meantime taken or received by or held for accumulation for an income beneficiary. Principal includes:

- (1) Consideration received by the trustee on the sale or other transfer of principal or on repayment of a loan or as a refund or replacement of a change in the form of principal;
(2) Proceeds of property taken on eminent domain proceedings;
(3) Proceeds of insurance upon property forming part of the principal except proceeds of insurance upon a separate interest of an income beneficiary;
(4) Stock dividends, receipts on liquidation of a corporation, and other corporate distributions as provided in section 456.750;
(5) Receipts from the disposition of corporate securities as provided in section 456.760;
(6) Royalties and other receipts from disposition of natural resources as provided in sections 456.780 and 456.790;
(7) Receipts from other principal subject to depletion as provided in section 456.800;
(8) Any profit resulting from any change in the form of principal;
(9) Any allowances for depreciation established under section 456.770 and subdivision (2) of subsection 1 of section 456.810.

3. After determining income and principal in accordance with the terms of the trust instrument or of this chapter, the trustee shall charge to income or principal expenses and other charges as provided in section 456.810.]

[456.730. 1. An income beneficiary is entitled to income from the date specified in the trust instrument, or, if none is specified, from the date an asset becomes subject to the trust. In the case of an asset becoming subject to a trust by reason of a will, it becomes subject to the trust as of the date of the death of the testator even though there is an intervening period of administration of the testator's estate; but, during such period of administration the personal representative of the testator's estate shall have no duty to distribute income currently to any such income beneficiary, unless otherwise provided by the governing instrument.

2. In the administration of a decedent's estate or an asset becoming subject to a trust by reason of a will:

11 (1) Receipts due but not paid at the date of death of the testator are principal;
12 (2) Receipts in the form of periodic payments, other than corporate
13 distributions to stockholders, including rent, interest, or annuities, not due at the date
14 of the death of the testator shall be treated as accruing from day to day. That portion
15 of the receipt accruing before the date of death is principal, and the balance is
16 income.
17 3. In all other cases, any receipt from an income-producing asset is income
18 even though the receipt was earned or accrued in whole or in part before the date
19 when the asset became subject to the trust.
20 4. On termination of an income interest, the income beneficiary whose
21 interest is terminated, or his estate, is entitled to:
22 (1) Income undistributed on the date of termination;
23 (2) Income due but not paid to the trustee on the date of termination;
24 (3) Income in the form of periodic payments, other than corporate
25 distributions to stockholders, including rent, interest, or annuities, not due on the date
26 of termination, accrued from day to day.
27 5. Corporate distributions to stockholders shall be treated as due on the day
28 fixed by the corporation for determination of stockholders of record entitled to
29 distribution or, if no date is fixed, on the date of declaration of the distribution by the
30 corporation.
31 6. Unless the terms of the trust refer to this subsection and provide otherwise,
32 upon the death of an income beneficiary who was the spouse of the settlor at the time
33 any property was considered transferred to the trust by the settlor for federal gift tax
34 purposes or was the surviving spouse of a decedent in whose gross estate for federal
35 estate tax purposes was included property which was considered transferred to the
36 trust for federal estate tax purposes as a result of the decedent's death, any item of
37 income described in subsection 4 of this section which is not payable to the estate of
38 the income beneficiary pursuant to that subsection or pursuant to the terms of the
39 trust shall be distributed to those persons, associations, corporations, trusts or
40 governmental agencies, including the estate of the income beneficiary, who shall be
41 appointed to receive such items of income by the income beneficiary by a provision
42 in such beneficiary's will or an inter vivos deed or other instrument signed by such
43 beneficiary. Such power of appointment shall be exercisable by the income
44 beneficiary alone and in all events. If the income beneficiary shall fail so to provide
45 for the appointment of all of such items of income, or if any such provisions shall,
46 for any reason, not effectively appoint all of such items of income, all of such items
47 of income not so effectively appointed shall be distributed pursuant to the terms of
48 the trust. This subsection shall be effective with respect to all wills and revocable
49 inter vivos trusts executed or created by persons who die or have died after December
50 31, 1981, and to irrevocable inter vivos trusts which are or have been created after
51 December 31, 1981.]

2 [456.740. 1. Unless the will otherwise provides, and subject to subsection
2 of this section, all expenses incurred in connection with the settlement of a

3 decedent's estate, including debts, funeral expenses, estate taxes, penalties concerning
4 taxes, family allowances, fees of attorneys and personal representatives, and court
5 costs shall be charged against the principal of the estate.

6 2. Unless the will otherwise provides, income from the assets of a decedent's
7 estate after the death of the testator and before distribution, including income from
8 property used to discharge liabilities, shall be determined in accordance with the rules
9 applicable to a trustee under this chapter and distributed as follows:

10 (1) To specific legatees and devisees, the income from the property
11 bequeathed or devised to them respectively, less taxes, ordinary repairs, and other
12 expenses of management and operation of the property, and an appropriate portion
13 of interest accrued since the death of the testator on indebtedness secured by such
14 property and of taxes imposed on income, excluding taxes on capital gains, which
15 accrue during the period of administration;

16 (2) To the legatee of a pecuniary bequest not in trust to the extent the same
17 remains unsatisfied twelve months after the date of the death of the testator, interest,
18 which shall be paid from the balance of the income, at a rate equal to that allowed by
19 law on money due upon order of the court, except that if the court finds that any such
20 bequest cannot be paid without jeopardizing the rights of interested parties because
21 of litigation or other circumstances, the court shall determine what rate of interest,
22 if any, shall be allowed, after taking into consideration the income of the estate; and

23 (3) To all other legatees and devisees, except legatees of pecuniary bequests
24 not in trust, the remaining balance of the income, less the balance of taxes, ordinary
25 repairs, and other expenses of management and operation of all property from which
26 the estate is entitled to income, interest accrued since the death of the testator, interest
27 paid by the estate with respect to estate taxes and taxes imposed on income,
28 excluding taxes on capital gains, which accrue during the period of administration,
29 in proportion to their respective interests in the undistributed assets of the estate
30 computed at times of distribution on the basis of inventory value; but the amount of
31 income earned during the further administration of the estate from and after the date
32 or dates of payment of any estate tax shall be distributed to such beneficiaries in
33 proportion to their respective interests in the undistributed assets of the estate after
34 the making of such payments on the basis of the fair market value of such assets
35 immediately after the making of such payment.

36 3. Income received by a trustee under subsection 2 of this section shall be
37 treated as income of the trust.]

2 [456.750. 1. Corporate distributions of shares of the distributing corporation,
3 including distributions in the form of a stock split or stock dividend, are principal.
4 A right to subscribe to shares or other securities issued by the distributing corporation
5 accruing to stockholders on account of their ownership and the proceeds of any sale
6 of the right are principal.

7 2. Except to the extent that the corporation indicates that some part of a
8 corporate distribution is a settlement of preferred or guaranteed dividends accrued
since the trustee became a stockholder or is in lieu of an ordinary cash dividend, a

9 corporate distribution is principal if the distribution is pursuant to:

10 (1) A call of shares;

11 (2) A merger, consolidation, reorganization, or other plan by which assets of
12 the corporation are acquired by another corporation; or

13 (3) A total or partial liquidation of the corporation, including any distribution
14 which the corporation indicates is a distribution in total or partial liquidation or any
15 distribution of assets, other than cash, pursuant to a court decree or final
16 administrative order by a government agency ordering distribution of the particular
17 assets.

18 3. Distributions made from ordinary income by a regulated investment
19 company or by a trust qualifying and electing to be taxed under federal law as a real
20 estate investment trust are income. All other distributions made by the company or
21 trust, including distributions from capital gains, depreciation, or depletion, whether
22 in the form of cash or an option to take new stock or cash or an option to purchase
23 additional shares, are principal.

24 4. Except as provided in subsections 1, 2, and 3 of this section, or unless the
25 trustee determines otherwise, as provided in subsection 5 of this section, all corporate
26 distributions are income, including cash dividends, distributions of or rights to
27 subscribe to shares or securities or obligations of corporations other than the
28 distributing corporation, and the proceeds of the rights or property distributions.
29 Except as provided in subsections 2 and 3 of this section, or otherwise determined
30 by the trustee pursuant to subsection 5 of this section, if the distributing corporation
31 gives a stockholder an option to receive a distribution either in cash or in its own
32 shares, the distribution chosen is income.

33 5. The trustee may rely upon any statement of the distributing corporation as
34 to any fact relevant under any provision of this chapter concerning the source or
35 character of dividends or distributions of corporate assets.]

2 [456.760. 1. Bonds or other obligations for the payment of money are
3 principal at their inventory value, except as provided in subsection 2 for discount
4 bonds. No provision shall be made for amortization of bond premiums or for
5 accumulation for discount. The proceeds of sale, redemption, or other disposition of
6 the bonds or obligations are principal.

7 2. The increment in value of a bond or other obligation for the payment of
8 money payable at a future time in accordance with a fixed schedule of appreciation
9 in excess of the price at which it was issued is distributable as income. The
10 increment in value is distributable to the beneficiary who was the income beneficiary
11 at the time of increment from the first principal cash available or, if none is available,
12 when realized by sale, redemption, or other disposition. Whenever unrealized
13 increment is distributed as income but out of principal, the principal shall be
14 reimbursed for the increment when realized.]

15 [456.770. 1. If a trustee uses any part of the principal in the continuance of
16 a business of which the settlor was a sole proprietor or a partner, the net profits and
losses of the business shall be computed in accordance with generally accepted

17 accounting principles for a comparable business. Net profits are income; and if a loss
18 results in any fiscal year, the loss shall be carried into a subsequent fiscal year for
19 purposes of computing income of the business.

20 2. Generally accepted accounting principles shall be used to determine
21 income from an agricultural or farming operation, including the raising of animals
22 or the operation of a nursery.]

[456.780. 1. Unless the governing instrument provides otherwise or the
2 decedent prior to death or the settlor treated the receipts otherwise, if any part of the
3 principal consists of a right to receive royalties, overriding or limited royalties,
4 working interests, production payments, net profit interests, or other interests in
5 minerals or other natural resources in, on or under land, the receipts from taking the
6 natural resources from the land shall be allocated as follows:

7 (1) If received as rent on a lease or extension payments on a lease, the
8 receipts are income;

9 (2) If received from a production payment, the receipts are income to the
10 extent of any factor for interest or its equivalent provided in the governing
11 instrument. There shall be allocated to principal the fraction of the balance of the
12 receipts which the unrecovered cost of the production payments bears to the balance
13 owed on the production payment, exclusive of any factor for interest or its equivalent.
14 The receipts not allocated to principal are income;

15 (3) If received as a royalty, overriding or limited royalty, or bonus, or from
16 a working, net profit, or any other interest in minerals or other natural resources,
17 receipts not provided for in the preceding subdivisions of this subsection shall be
18 apportioned on a yearly basis in accordance with this subdivision whether or not any
19 natural resource was being taken from the land at the time the trust was established.
20 Fifteen percent of the gross receipts, but not to exceed fifty percent of the net receipts
21 remaining after payment of all expenses, direct and indirect, computed without
22 allowance for depletion, shall be added to principal as an allowance for depletion.
23 The balance of the gross receipts, after payment therefrom of all expenses, direct and
24 indirect, is income.

25 2. If a trustee, on September 28, 1983, held an item of depletable property of
26 a type specified in this section, he shall allocate receipts from the property in the
27 manner used before September 28, 1983, but as to all depletable property acquired
28 on or after September 28, 1983, by an existing or new trust, the method of allocation
29 provided herein shall be used.

30 3. This section does not apply to timber, water, soil, sod, turf, or mosses.]

[456.790. If any part of the principal consists of land from which
2 merchantable timber may be removed, the receipts from taking the timber from the
3 land shall be allocated in accordance with subdivision (3) of subsection 1 of section
4 456.710.]

[456.800. Except as provided in sections 456.780 and 456.790, if the
2 principal consists of property subject to depletion, including leaseholds, patents,
3 copyrights, royalty rights, rights to receive payments from a benefit plan including,

4 without limitations, any pension, retirement, individual retirement, death benefit,
5 stock bonus or profit sharing plan, or system of trust, and rights to receive payments
6 on a contract for deferred compensation, in no event shall the trust be deemed to have
7 received income with respect to such property until the trust receives a distribution
8 with respect to such property, and, in any event, only ten percent of the receipts from
9 such property on a noncumulative basis is income, and the balance is principal.]

[456.810. 1. The following charges shall be made against income:

2 (1) Ordinary expenses incurred in connection with the administration,
3 management, or preservation of the trust property, including regularly recurring taxes
4 assessed against any portion of the principal, water rates, premiums on insurance
5 taken upon the interests of the income beneficiary, remainderman, or trustee, interest
6 paid by the trustee, and ordinary repairs;

7 (2) A reasonable allowance for depreciation on property subject to
8 depreciation under generally accepted accounting principles, but no allowance shall
9 be made for depreciation of that portion of any real property used by a beneficiary as
10 a residence or for depreciation of any property held by the trustee on September 28,
11 1983, for which the trustee is not then making an allowance for depreciation;

12 (3) Court costs, attorney's fees, and other fees on accountings or judicial
13 proceedings if the matter primarily concerns the income interest, unless the court
14 directs otherwise;

15 (4) One-half of the trustee's regular compensation, whether based on a
16 percentage of principal or income, and all expenses reasonably incurred for current
17 management of principal and application of income;

18 (5) Any tax levied upon receipts defined as income under the provisions of
19 this chapter or the trust instrument and payable by the trustee.

20 2. If charges against income are of unusual amount, the trustee may by means
21 of reserves or other reasonable means charge them over a reasonable period of time
22 and withhold from distribution sufficient sums to regularize distributions.

23 3. The following charges shall be made against principal:

24 (1) Trustee's compensation not chargeable to income under subdivisions (3)
25 and (4) of subsection 1, special compensation of trustees, expenses reasonably
26 incurred in connection with principal, court costs and attorney's fees primarily
27 concerning matters of principal, and trustee's compensation computed on principal
28 as an acceptance, distribution, or termination fee;

29 (2) Charges not provided for in subsection 1, including the cost of investing
30 and reinvesting principal, the payments on principal of an indebtedness, including a
31 mortgage amortized by periodic payments of principal, expenses for preparation of
32 property for rental or sale, and, unless the court directs otherwise, expenses incurred
33 in maintaining or defending any action to construe the trust or protect it or the
34 property or assure the title of any trust property;

35 (3) Extraordinary repairs or expenses incurred in making a capital
36 improvement to principal, including special assessments, but, a trustee may establish
37 an allowance for depreciation out of income to the extent permitted by subdivision

38 (2) of subsection 1 and by section 456.770;

39 (4) Any tax levied upon profit, gain, or other receipts allocated to principal
40 notwithstanding denomination of the tax as an income tax by the taxing authority;

41 (5) If an estate tax is levied in respect of a trust in which both an income
42 beneficiary and a remainderman have an interest, any amount apportioned to the
43 trust, including interest and penalties, even though the income beneficiary also has
44 rights in the principal.

45 4. Regularly recurring charges payable from income shall be apportioned to
46 the same extent and in the same manner that income is apportioned under section
47 456.730.]

2 [456.820. Except as specifically provided in the trust instrument or the will
3 or in sections 456.700 to 456.820, these sections shall apply to any receipt or expense
4 received or incurred on or after September 28, 1983, by any trust or decedent's estate
5 whether established before or on or after September 28, 1983, and whether the asset
involved was acquired by the trustee before or on or after September 28, 1983.]
